4. Go to your email inbox and search for the email from noreply@rdmobile.com, subject line “Log in to AAS 244 Meeting,” and click on “Log In Now.”

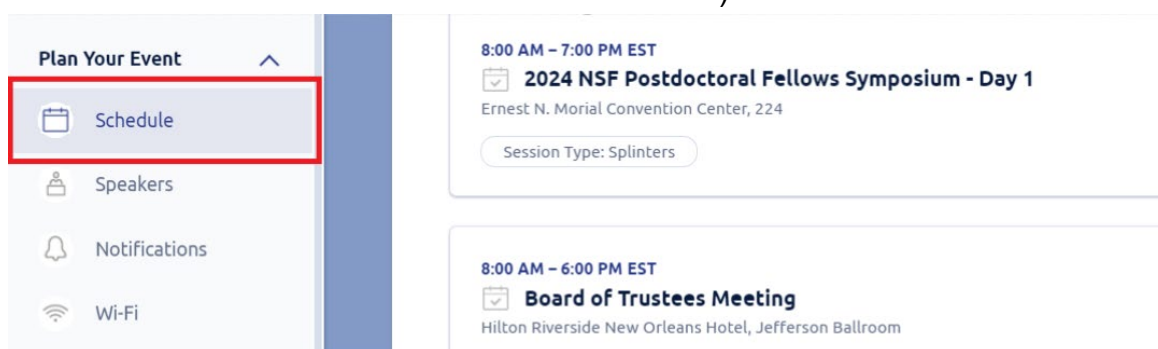

Note that this link is specific to you and can't be shared with others.

Creating your personal itinerary / planning your event

We suggest planning your day before you arrive at the venue. With the AAS meeting app, you can create your own personal schedule before you arrive, including choosing your sessions and exhibitors to visit. On the day, you'll be ready to go and know what's coming up next/where you need to be to maximize your day!

1. In the desktop, In the left-hand menu, select “Schedule” at the bottom of the screen on a mobile device or under “Plan Your Event” on a desktop (see the screenshot below).

2. View session descriptions, speaker information, and other details by clicking/tapping the session names or using the search bar.
3. To add a session to your schedule, open it and click the “Select Session” icon to the right on a desktop or tap the calendar icon on a mobile device.
4. To review your personal schedule on a desktop, click “My Schedule” on the Schedule page. To do so on a mobile device, tap “Schedule”, go to “Filters” at the top right, tap “Selected”, and tap Apply. You can also view events in your schedule in the Dashboard on your mobile device.
